

**Job Title: *Developer + DevOps Specialist***  
**Reports To: *Principal***

## **SUMMARY**

Accomplishes Web development and devops project requirements by performing technical development activities, including the following duties.

**ESSENTIAL DUTIES AND RESPONSIBILITIES** include the following. Other duties may be assigned.

- Effectively manage containers, servers, and deployment workflows for multiple projects
- Take pride in producing high-quality, scalable, easily maintainable application code
- Able to work collaboratively with internal teams and clients
- Adapts to emerging project needs based on feedback from users, management, team members and client communications.
- All other duties as assigned by the Principal.

## **QUALIFICATIONS**

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Demonstrated expertise with DevOps workflows and processes, particularly Linux-based containerization
- Familiarity with Gitlab / Gitlab CI and other code management and deployment tools
- Familiarity with Agile development processes and conventions
- Experience with PHP, Javascript, and/or Python
- Experience with Drupal is a plus
- Experience with public sector or scientific work is a plus
- Excellent organizational and time management skills; strong, effective problem-solving skills
- Low-key, no-drama work style

## **PROJECTS**

Tasks for this role are anticipated to consist of a mix of development and devops activities, with the exact mix varying depending on project schedules and needs. Efforts will flex between DevOps and development efforts from week to week. Projects will include, but are not limited to:

- Designing and implementing server and workflow management architectures for client as well as internal projects
- Code + infrastructure performance monitoring and optimization
- Support existing server deployments and workflows as needed
- Development tasks on projects that are a good fit for your skills and interests
- Infrastructure and code support for managing machine learning workflows

## **EDUCATION and/or EXPERIENCE**

Bachelor's Degree in CS or equivalent experience; demonstrated ability to produce quality code, as evidenced by Github repos or other examples of work; demonstrated experience and knowledge relating to managing devops workflows; demonstrated experience delivering projects on time and on budget while maintaining effective working relationships with the team.

Squishymedia believes that our work and our communities benefit from a diverse team. Individuals from underrepresented communities in tech are strongly encouraged to apply.
