

Job Title: *Front-End Developer*

Reports To: *Principal*

SUMMARY

Accomplishes interactive design/development and front-end development project objectives in a role encompassing the following duties.

ESSENTIAL SKILLSETS include the following:

- Demonstrated fluency in HTML/CSS (Demonstrated experience with Responsive is a must)
- Experience coding JavaScript/JQuery for front-end functionality
- Thorough experience working with Sass and LESS
- Experience with git workflow
- Expert knowledge of cross-browser limitations and code fixes
- Familiar with the QA process and implementation of QA fixes
- Ability to multi-task, prioritize and manage workload
- Ability to tackle prototyping, wireframing, and lightweight design tasks as needed

Desirable skills include Drupal theme development, a more extensive skillset encompassing JavaScript application development skills, or more design-oriented skills (IA and/or UX design skillsets)

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Take pride in producing high-quality, easily maintainable sites and applications
- Able to work collaboratively with internal teams and clients
- Adapts to emerging project needs based on feedback from users, management, team members and client communications
- Performs thorough QA efforts on sites to ensure quality of project deliverables
- All other duties as assigned by the Principal.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- At least two or three years of directly relevant professional experience. Candidates with less experience will be considered, but this is not an entry-level position.
- Familiarity with Agile development processes and conventions
- Experience with public sector or scientific work is a plus
- Exposure to or experience with Drupal 7 or 8 is a plus
- Excellent organizational and time management skills; strong, effective problem-solving skills.
- Low-key, no-drama work style

PROJECTS

As a member of Squishymedia's team you'll be focused on a rotating set of website and application design/builds, maintenance projects and expansions, and will frequently be a part of a team working on efforts where a significant application requirement is present. Projects will likely include, but are not limited to:

- Drupal- and JavaScript-based sites to support community engagement and information dissemination on healthcare and educational topics

- Development of front-end interfaces to support complex applications running on a variety of backend platforms
- Rapid prototyping of JavaScript-based interfaces to help project teams explore various approaches to interacting with backend applications and databases
- Design and development of mobile applications for educational, health, and nutrition uses

EDUCATION and/or EXPERIENCE

Bachelor's Degree or equivalent experience; demonstrated ability to produce quality web front-ends, as evidenced by links and/or Github repos or other examples of work; demonstrated experience delivering projects on time and on budget while maintaining effective working relationships with the team.
