

Job Title: Front-End JavaScript Designer/Developer
Reports To: Principal

SUMMARY

Come advance your career and do good for our communities at SquishyMedia. Since 2001 our firm has built a reputation for high-quality design and development for our clients in healthcare, science, and education. As a developer at SquishyMedia you'll have autonomy and responsibility on projects advancing the public interest. We are confident you will find great professional satisfaction in building applications to help researchers manage scientific data, to help programs disseminate important information in healthcare and education support, and building impactful applications in areas including clinical and research-oriented healthcare applications, educational support initiatives, and community engagement. And you'll do this while working a standard 40 hour week with competitive compensation and benefits.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Deliver production-ready front-end code and design assets
- Provide visual design and conceptual wireframing activities
- Maintain legacy code in existing web applications
- Identify, evaluate, and recommend new web technologies and frameworks
- Work collaboratively with clients and internal teams
- Manage multiple projects and deadlines
- Work within an Agile development process
- Perform thorough QA efforts ensuring quality project deliverables

This position is roughly 30% design, 70% code, though that will flex as projects start and ship over time.

ESSENTIAL QUALIFICATIONS/SKILL SETS

- 2+ years of directly relevant professional experience. This is not an entry-level position.
- Demonstrated proficiency with Adobe CC applications or equivalents
- Demonstrated fluency in JavaScript and a front-end framework (React, Ember, etc.)
- Demonstrated proficiency with Responsive and mobile-first design
- Proven ability to deliver quality projects on time and within budget
- Experience with JavaScript testing libraries (Jest, Mocha, etc.)
- Demonstrated proficiency in HTML/CSS/SASS
- Experience with the Git workflow
- Detailed knowledge of cross-browser and cross-platform development
- Ability to multi-task, prioritize and manage workload
- Eagerness to continue learning
- Excellent organizational and time management skills; strong, effective problem-solving skills
- Exemplifies humility, confidence, and an independent spirit
- Low-key, no-drama work style

BONUS SKILLS

- Experience with progressive web apps (PWA)
- Ability to tackle prototyping, wireframing, and lightweight design tasks
- Experience working in Sketch, InVision, Photoshop, or Illustrator
- Experience with public sector or scientific work

PROJECTS

As a key member of Squishymedia's development team you'll be taking a lead role on designing and building the user experience. These applications are used for managing and analyzing large neuroimaging databases, applications for modelling healthcare treatment outcomes, and collaboration applications for healthcare and education.

EDUCATION and/or EXPERIENCE

Bachelor's Degree in CS or equivalent experience; demonstrated ability to produce quality code, as evidenced by Github repos or other examples of work; demonstrated experience delivering projects on time and on budget while maintaining effective working relationships with the team.

Apply by sending your CV/resume and project samples (or other URLs) to wannawork@squishymedia.com.
