

Job Title: Full Stack Developer
Reports To: Principal

Come advance your career and do good for our communities at SquishyMedia. Since 2001 our firm has built a reputation for high-quality design and development for our clients in healthcare, science, and education. As a developer at SquishyMedia you'll have autonomy and responsibility on projects advancing the public interest. We are confident you will find great professional satisfaction in building applications to help researchers manage scientific data, to help programs disseminate important information in healthcare and education support, and building impactful applications in areas including aviation safety, health outcomes research, and community engagement. And you'll do this while working a standard 40 hour week with competitive compensation and benefits.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Produce high-quality, scalable, and easily maintainable web application code
- Actively provide continuous DevOps support on client and internal platforms
- Maintain legacy code in existing web applications
- Identify, evaluate, and recommend new web technologies and frameworks
- Work collaboratively with clients and internal teams
- Manage multiple projects and deadlines
- Work within an Agile development process
- Perform thorough QA efforts ensuring quality project deliverables

QUALIFICATIONS

- A **minimum** of 3-5 years experience with JavaScript application development (e.g., Node and/or React).
- Demonstrated mid-senior level technical engagement in projects, including technical planning and requirements definition
- Demonstrated experience with database technologies
- Demonstrated experience with JavaScript testing libraries (Jest, Mocha, etc.)
- Experience with infrastructure and operations and contemporary DevOps practices
- Comfortable with standard code and platform management tools (Git, Docker, etc.)
- Familiarity with Agile development processes
- Ability to work in a team environment
- Excellent organizational and time management skills; strong, effective problem-solving skills
- Eagerness to continue learning
- Exemplifies humility, confidence, and an independent spirit
- Low-key, no-drama work style

Bonus points for experience with public sector or scientific work, experience with Drupal, and/or experience developing progressive web applications

PROJECTS

As a key member of SquishyMedia's development team you'll be taking a lead role on applications built in JavaScript including applications for managing and analyzing large neuroimaging databases, applications for modelling healthcare treatment outcomes, and collaboration applications for healthcare and education.

EDUCATION and/or EXPERIENCE

Bachelor's Degree in CS or equivalent experience; demonstrated ability to produce quality code, as evidenced by Github repos or other examples of work; demonstrated experience delivering projects on time and on budget while maintaining effective working relationships with the team.

Apply by sending your CV/resume and code samples (or other URLs) to wannawork@squishymedia.com.
